Collection "Kirov Material" – Güldendorf Clinic

File reference: GÜL/KIR-52/INV-001

Compiled on:	14 October 1952
Compiled by:	Dr. med. Helmut SCHÄFER, Senior Physician
Verified by:	Captain W. Reinhardt, People's Police District Office, Frankfurt/Oder
Purpose:	Inventory following relocation of materials from the N.A. Kirov Clinic, Moscow (USSR)
Relocation dates:	3 – 17 March 1952
Transport route:	Moscow → Brest → Warsaw → Frankfurt (Oder) → Güldendorf
Volume:	see overview below

1. OVERALL OVERVIEW OF THE COLLECTION

Patient files (F.1 – F.47):	47 folders
Personnel records:	12 cards
Protocol books (I – III):	3 volumes
Photographic material:	9 boxes
X-ray plates:	4 cassettes (Nos. 1949–1952)
Correspondence (USSR/GDR):	2 binders
Total number of units:	77

2. PATIENT FILE STATUS BREAKDOWN

TRANSFERRED (VERLEGT) – sent to other institutions:	31 files
DECEASED (VERSTORBEN) – prior to October 1952:	13 files
ESCAPED (ENTKOMMEN) – whereabouts unclear or unknown:	3 files

Note: The category "ESCAPED" was introduced by express instruction of Department IV, after the standard transport list from Moscow was found to contain three entries without a destination institution. An inquiry has been submitted to the USSR Ministry of Health, but no reply has been received (as of 10 October 1952).

Legend:
T TRANSFERRED – file forwarded, destination documented
† DECEASED – patient died prior to inventory
• ESCAPED – no valid transfer protocol, no destination

HANDWRITTEN NOTE

Annex to Special Note F.23 – p. 14 of the Inventory

Author: Dr. med. H. Schäfer · 3 November 1952

Frankfurt (Oder), 3 November 1952.

To the esteemed leadership of Department IV —

I feel it is my duty to add a personal note at the close of this inventory — one which I could not include in the official record.

File F.23 was not transferred by us. The folder was empty on 14 May. There was no outgoing protocol. No transport order. Neither the Ministry in Moscow nor our own department has any knowledge of who removed the file or the patient.

I personally inspected archive shelf B-IV. The seal was intact. The envelope showed no signs of forced entry. Only the inner document was missing — together with the X-ray, the case history, and the photograph.

This means: someone with key authority removed the material between 14 March and 14 May 1952. There are only four persons at Güldendorf with access to B-IV. I am one of them. The other three have been questioned — without result.

I hereby state that, in my judgement, the whereabouts of patient F.23 lie beyond the reach of the USSR and the GDR. Whether in West Berlin, in the British or American zone — or further afield — I cannot say.

I request that the leadership of Department IV preserve this note and present it should inquiries be made by higher authorities. I will undertake no further investigation.

— H. Sch.
